

Yokohama Royal Park Hotel takes responsibility toward achieving the Sustainable Development Goals.

Together with addressing issues, we undertake various initiatives to earn the trust of society, guests, and business partners.

Promotion of 3010 campaign for banquet buffets

We introduce to organizers the 3010 campaign being promoted by the Ministry of the Environment.

Promotion of food waste recycling

We generate biogas from food waste for use as renewable energy in power generation.

Effective use as vegetable broth

We use vegetable scraps and such effectively for broth instead of throwing them away.

Introduction of biodegradable straws

We use biodegradable straws that are friendly to the environment.

Reuse of products nearing expiry dates

We provide bread unsold by the delicatessen at the lounge for free.

Introduction of fair trade products

We use certified wine and coffee with Fairtrade International certification.

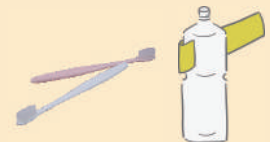

Sale of "loss flowers"

We sell bouquets made mainly from unused flowers originally bought for decorative purposes.

Environmentally friendly guest rooms

We use eco-friendly amenities and mineral water using 100% recycled PET bottles in some guest rooms.

In recognition of these initiatives, we received the following certifications.

- Certified and registered as a Kanagawa SDGs Partner being promoted by Kanagawa Prefecture (May 2022)
- Attained "Supreme" certification, the highest level for businesses, under Yokohama City's "Y-SDGs" certification system for the SDGs (July 2022)
